

Oppo Supports are made of 4-way stretch spandex with 100% cotton lining. This helps keep your skin dry and comfortable. A super absorbent lining that provides both comfort and durability.

ELASTIC KNEE SUPPORT (2022)

- For arthritic knee conditions, minor sprains & strains
- Firm support for joint structures with gentle compression over kneecap
- Increases healing & keeps joints flexible
- Measure knee circumference around knee joint

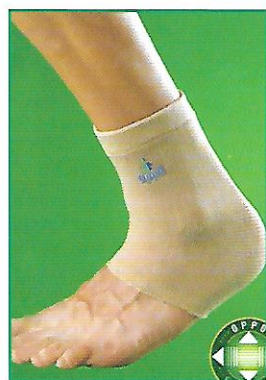

NEOPRENE KNEE SUPPORT (1021)

- Open patella relieves pressure
- Helpful for post-operative knee sprains, strains & arthritis
- Reinforced patella prevents displacement
- Mid-section of knee circumference required to determine size

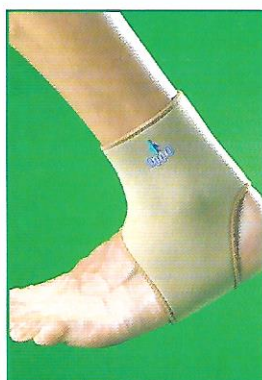

ARMSLING (3187)

- For right or left arm
- Supports the arm & carries the weight across the back of the shoulder
- Suitable for upper arm fracture & dislocated shoulders

ELASTIC ANKLE SUPPORT (2001)

- Ideal for weak or unstable ankles
- Gives support & compression, increasing circulation to relieve pain & speed-up healing & maintains flexibility
- Measure around ankle joint to determine size

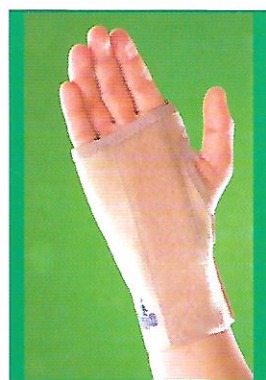

NEOPRENE ANKLE SUPPORT + OPEN HEEL (1001)

- Open toe & heel design allows full range of motion
- Provides compression for weak or overstressed ankles
- Measure above ankle bone to determine size

WRIST SUPPORT ELASTIC (2281)

- Helps relieve pain from an injured or weak wrist
- Provides firm support & gentle compression over the wrist
- Provides heat retention
- Wrist circumference required to determine size

WRIST SPLINT BRACE (2082)

- Removable aluminium splints can be bent to desired position
- Splint can be removed to fit either left or right hand
- Comfortable, effective support
- Wrist circumference required to determine size

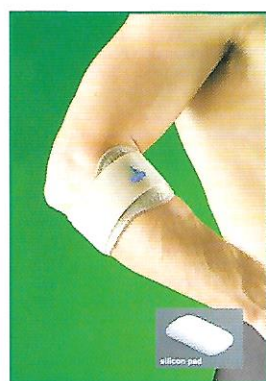

ELASTIC WRIST WRAP (2083)

- Universal design fits left & right hand
- Provides comfortable compression & support
- Suitable for weak & strained wrists
- One size fits all

WRIST/ THUMB SUPPORT (1084)

- Elastic hook & loop fastener ensures comfortable fit
- Support for carpal tunnel syndrome & general wrist support
- Wrist circumference required to determine size

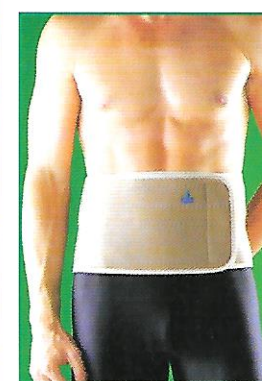

TENNIS/ ELBOW SUPPORT + SILICONE PAD (1486)

- Rapidly improves joint function
- Specially shaped silicone inserts helps relieve strain on the soft tissue around the elbow
- One size fits all

ELBOW SUPPORT ELASTIC (2085)

- Provides heat, support & compression to the elbow joint area without restricting flexibility
- Helps relieve pain from an injured or weak elbow
- Measure around elbow joint to determine size

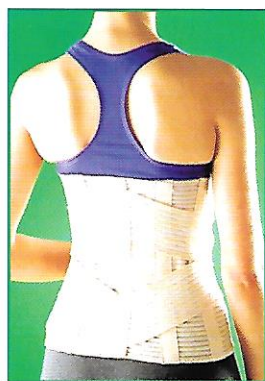

NEOPRENE WAIST BELT (1060)

- Great for walking, running, aerobics & other sports activities
- Suitable for mild lower back ache
- Gives support to lower back & eliminates excess water weight
- One size fits all

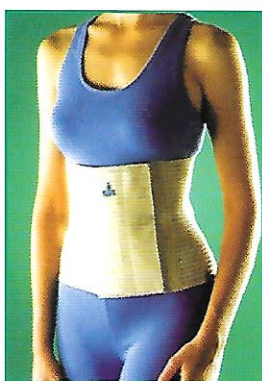

FOR SPORTS & MUSCLE INJURIES

Opppo Supports are made of 4-way stretch spandex with 100% cotton lining. This helps keep your skin dry and comfortable. A super absorbent lining that provides both comfort and durability.

SACRO LUMBAR SUPPORT (2065)

- Designed with straps crossing the back & fastened in front
- Four pliable support splints at the back for extra stability
- Comfortable to wear & provides excellent support
- Waist measurement required to determine size

ABDOMINAL BINDER (2160)

- Indicated for post operative & post childbirth abdominal constraint
- Made of light, breathable elastic multiband material
- Provides contour adjustability between waist & hips
- Helps to relieve back pain
- Waist measurement required to determine size

SACRAL CINCH BELT (2061)

- Provides support & variable compression to the sacrum & sacroiliac region of the spine
- Used for therapeutic or prophylactic support
- Ideal for sports medicine
- One size fits all

POSTURE AID / CLAVICLE BRACE (2075)

- Excellent aid in correcting poor posture & shoulder slump
- Adjustable hook & loop closure facilitates proper fit
- Suitable for adults & children
- Measure around chest to determine size

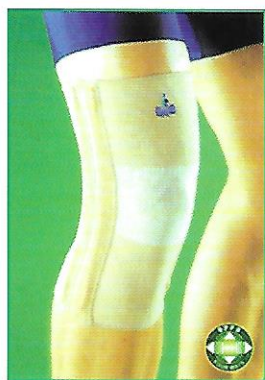

ADJUSTABLE KNEE STABILIZER (1230)

- Two medial & lateral spiral stays provide additional support & stability for the knee
- Open patella designed to relieve pressure
- Heat retention & compression reduces potential for strain or injury
- One size fits all

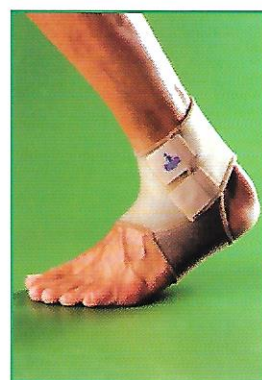

NEOPRENE KNEE STABILIZER (1030)

- Provides additional support & stability for the knee
- Neoprene circle pad around the patella provides padded protection & stabilization to prevent displacement
- Mid-section of knee circumference required to determine size

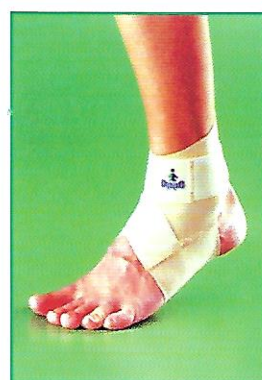

SPIRAL KNEE SUPPORT (2030)

- Four medial & lateral metal stays provide additional support & stability for the knee
- For arthritic knee conditions, minor sprains & strains
- Improves healing & keeps joints & muscles flexible
- Knee circumference required to determine size

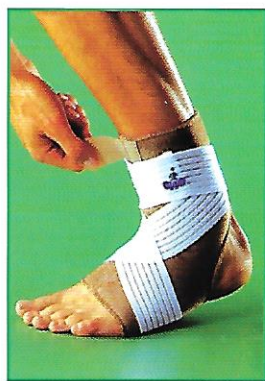

NEOPRENE ANKLE SUPPORT (1201)

- Provides effective support for sprains & strains, damaged ligaments & muscles & weak or unstable ankle conditions
- Fully adjustable hook & loop fasteners ensure optimum fit
- Measure around ankle joint to determine size

ELASTIC ANKLE SUPPORT (2103)

- Adjustable strap maintains desired compression
- Figure-eight construction for compression & pain relief
- Excellent support for weak, injured ankles or arches
- Measure around ankle joint to determine size

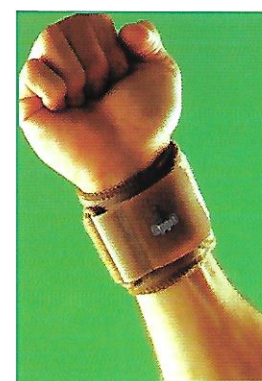

NEOPRENE ANKLE SUPPORT (1003)

- Open toe & heel design allows full range of movement
- Relieves pain due to strain or stiffness
- Provides compression for weak or over-stressed ankles
- Measure around ankle joint to determine size

THIGH SUPPORT (2040)

- Helps relieve pain from an injured or weak thigh
- Provides heat retention
- Effective support for strained groin muscle & torn hamstrings
- Measure around the thigh to determine size

NEOPRENE WRIST WRAP (1081)

- Helps relieve pain through pressure on injured wrists
- Provides firm support around weak or strained area
- Adjustable hook & loop strap ensures comfortable fit & stabilization during activities
- One size fits all
